

SADDLE & TACK CONDITIONER

This product was developed specifically for treating heavy leather items such as saddles, chaps, saddle bags, harnesses and other equestrian tack. This rich formula will penetrate deep into thick leather and will not leave the leather oily nor will it darken the leather. ***Saddle & Tack Conditioner*** will not wash out once it has dried in the leather. It is non-toxic and contains no VOCs or silicone.

Directions

The leather to be treated and the conditioner should both be at room temperature. Using a soft, lint-free cloth or sponge brush, gently apply a layer of ***Saddle & Tack Conditioner*** to both sides of the clean leather. Allow the leather to dry (2 to 4 hours). Note that the leather will look darker until it has dried. Once dry, buff the surface with a soft cloth. If the leather is extremely stiff or dry, then reapply a second coat.

Remember, more is not necessarily better, a little goes a long way.

Saddle & Tack Conditioner will help to bring out the natural color of the leather and leave a soft shine. If an additional, higher-shine is desired, see our ***Leather Polish*** product.

*NOTE: Do not use ***Saddle & Tack Conditioner*** on Suede or Nubuck items.*

To increase the longevity of your thicker leather, apply a leather conditioner to clean leather every 3 to 6 months or as needed. Regular conditioning will help retain the softness of the leather while keeping it supple and prevent future cracking.

Coverage

An 8 ounce bottle of ***Saddle & Tack Conditioner*** will treat approximately 1 - 2 saddles. The amount needed will depend upon how dry the items are.

DISCLAIMER: Being that leather is a natural material and is susceptible to varying degrees of deterioration, experience of the user and may be applied under conditions beyond our control, as seller, we make no warranty expressed or implied as to this material or its use. All information stated herein is accurate to the best of our knowledge and is based on thorough testing.
